

New Lube Oil Shed Arrives at AgGrow

The quick to erect shade sheds return to Emerald after recently attending field days in North Queensland, Farm Fest Toowoomba and Primex Casino. These agricultural field days have turned out to be a great success this year and now our touring sales staff are back and looking forward to AgGrow Emerald in 2008.

Ben, Transportable Shade Sheds Area Manager said that the mining boom and farmers counting on us returning to each show ensured long term relationships. Councils and business sectors have also been long term purchasers for dangerous good storage units, shade sheds and our general storage facilities.

Transportable Shade Sheds have been a regular exhibitor at AgGrow Emerald and this year they bring their new lube oil shed which is ideal for the evacuation, decanting and storage of oils, waste and lubricants. This shed is highly suited to mines, industrial businesses and farmers.

The popular large industrial and custom built shade sheds are also great for mines and agricultural farmers. These industrial sheds provide protection for trucks and workshop areas and the size can be custom built to suit each application.

Shade related products are quick to erect and transportable. Quick shades can be erected in 15 minutes and the colorbond shade sheds only take 3 hours to assemble. No trade skills or equipment are required other than a ladder and screw gun.

Environmental storage sheds meet the relevant Australian Standards criteria for the storage of chemical and flammable liquids.

For photos of the large industrial sheds and new lube oil shed visit their website www.shadesheds.com or call 0754 948027.

Transportable Shade Sheds will be at site C29 at AgGrow Emerald.
